Competency Centers: Enterprises Application Solution, Quality Assurance, Embedded Technologies.

SERVICES

Application Development & Maintenance

DUCAT TECHNOLOGIES is a recognized leader in the offshore industry with core competency in Application Development and Maintenance (ADM) services on a Fixed Price, SLA Model.

Application Development Services

DUCAT TECHNOLOGIES delivers sophisticated application development methodologies and highly effective Prototype-driven Iterative and Incremental Application Development approaches ably Supported by our proven onsite-offshore delivery model and mature quality management System.

These include:

- ▶ **Product Development**
- ▶ **Customised Development**
- ▶ **New Application Development**
- ▶ **Rapid Application Development**

APPLICATION MANAGEMENT SERVICES

DUCAT TECHNOLOGIES suites of Application Management Services include:

Portfolio Analysis Services to help decide the Retain-Extend-Retire (R-E-R) alignment of the application portfolio.

Application Maintenance Outsourcing (AMO) Services to help keep 'Retained Application portfolios up and running. DUCAT TECHNOLOGIES AMO service offering help reduce the Total Cost of Ownership (TCO) of the application through knowledge management, early Offshore leverage and application betterment solutions.

Legacy Modernization and Transformation and Re-engineering Services provide a tool based approach to help 'Extend' the application portfolio by increasing usability and value of the applications.

Application Migration Services provide proven methodology based services to help migrate applications to newer platforms and databases.

EMBEDDED SOFTWARE

DUCAT TECHNOLOGIES Embedded Technology Solutions practice focuses on development of software that embedded into products like cameras, handsets, PDAs, ovens, printers, scanners, POS devices, DVDs and MP3 players, play stations, vehicle and car controllers, elevator controllers, blood analyzers and others. The solutions developed involve deep expertise in Real-Time Operating Systems (RTOS) based boards, device drivers, middleware integration, modeling & simulation tools. DUCAT TECHNOLOGIES has successfully supported world leading Fortune 1000 companies, tool and real-time software vendors, and tier-1 OEMs with long relationships for services like research & evaluation, design & development, sustenance & maintenance and QA & testing.

OFFSHORE DEVELOPMENT CENTRES

The DUCAT TECHNOLOGIES Offshore model goes beyond simply executing software development projects from our offshore facilities. The ODC as opposed to a mere offshore 'projects' approach, serves as a virtual and seamless extension of information system facilities for our customers. The DUCAT TECHNOLOGIES ODC model is geared towards providing better flexibility and scalability options for our customers.

Specifically the ODCs offer:

- An exclusive facility with higher degree of physical and network security.
- Customized business continuity and disaster recovery plans.
- Provision of more efficient infrastructure and dedicated resources.
- Retention of customer specific Business, Process, and Architecture knowledge thru a set of key long-term resources.
- Flexible programming pool to meet the ever-changing technology needs.
- Option to augment and reduce resources to meet the sudden and unplanned peaks and troughs in resource requirements.
- Joint Program Management with customer to ensure commitment to the engagement.
- Commercial arrangement T&M or Fixed Price SLA based under a broad master Services Agreement.
